ADVANCED INPUT SYSTEMS ENVIRONMENTAL POLICY

This policy outlines overall environmental management system goals required to achieve the company environmental objectives and targets.

Operating our business in an environmentally responsible manner commands the highest priority at all levels. Advanced Input Systems is fully committed to environmental stewardship and safety for employees, customers, visitors, and community. This commitment is demonstrated by our continuous efforts to minimize the impact of our operations on the environment through the following goals:

1. Comply with all applicable local, state and federal environmental requirements. Through this commitment, we will identify and reduce impacts to local, regional, and global environmental arenas.
2. Actively pursue continuous improvement in environmental protection by utilizing an effective environmental management system. It is our objective to prevent pollution and to recover and recycle materials by continuously finding new ways to improve our operations. Continual improvement will be achieved by identifying environmental impacts and implementing corrective action procedures.
3. Review our environmental management system to ensure that our objectives and targets are achieved. We will enable our employees to perform their duties in a safe and responsible manner through written procedures and training. We will communicate with and involve all interested parties in our efforts to maintain an effective environmental management system.

This environmental policy is fully endorsed by management to ensure its implementation at all levels within the organization. Advanced Input Systems makes this policy available to all its employees and to the public.
